

***NEW Gate to Area C at Kapellskär Port*****Automated access control to Port of Kapellskär, November 2021**

The Port of Kapellskär will introduce a new, automated access gate to the port area starting November 1, 2021.

The gate to area C will automatically read your vehicle registration number plate and give you access if you have a valid reservation with correct registration number at Finnlines.

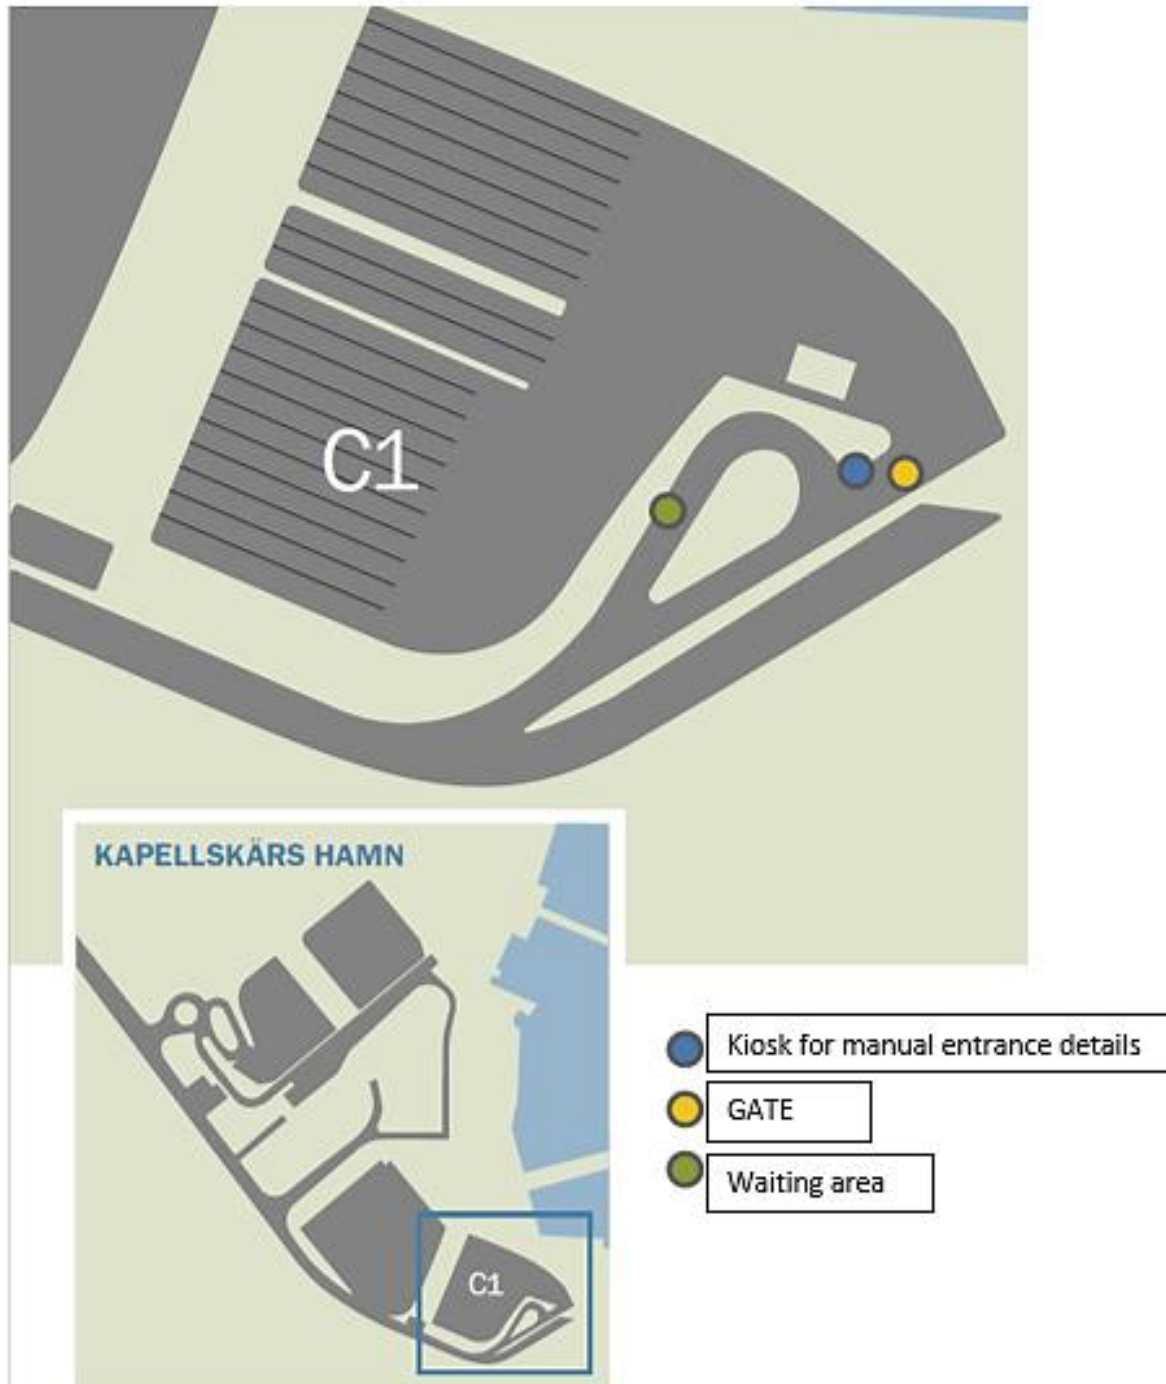

You are granted access max 7 hours prior to your departure. This means that, e.g., you will not be able to come to port in the evening to wait for your departure the next morning.

In case of problems you can also manually insert registration or booking number to the system in order to access the port.

The actual check in for Finnlink will be done once inside the port area in the usual manner in the usual location.

For more information or assistance, please contact your Finnlines Customer Service or Sales representative.

## Finnlink in area C

## Introduction of pre-gate in Kapellskär.

To streamline the flow of vehicles thru the port, we now introduce automatic number plate recognition (ANPR) to check in the database if the vehicle is booked or not. Booked vehicles will be let thru the gate, not recognized registration numbers will be instructed to turn to the side.

If the registration number is unreadable or the vehicle has been replaced for some reason, there is a kiosk with touchscreen where the customer can enter the valid number or booking reference.

### 1 Registration number

It is absolutely vital that the booking is made with the correct registration number for this function to work, so please make sure you update your booking if you change vehicles. To update after arriving to the port will be possible but complicated for all parties.

### 2 The gate opening time

For morning departures the gate opens 03.00 Swedish time, and for evening departures it opens 12.00.

### 3 Gate kiosk

Beside the gates there are kiosks with touchscreens, you can there choose your language and add your registration number or booking reference to open the gate. If this doesn't work, please turn to the side and follow the written instructions you will find at the kiosk.
